Safe. Secure. Sorted.

CYBERSECURITY AND EMAIL SPAM FILTER.

Detect Cyber Attacks before they can get to you.

Security Solutions to protect your IT Infrastructure, backup up your Microsoft 365 data, detect vulnerabilities and ensure compliance.

Cyber threats are on the rise as fraudsters use ever more sophisticated techniques to access or encrypt business critical data. That is why NPIT have a team of experts to plan, implement, monitor, and update your security measures and compliancy.

We can set assess your current security measures with regards to where your data is stored, how it is protected and backed up. We can then set up a process to minimise security breaches and ensure all your data is kept as secure and protected as possible.

Our offering for your secure remote and on-premises solutions include:

1. Anti-Virus

2. Anti-Spam

3. Microsoft 365 & Teams Backup

4. Training

5. Audits and Compliance Checks

6. Cyber Essentials Certification

Services

No Problem IT
Safe. Secure. Sorted.

Anti-Virus
Robust security you can rely on.

Protect devices from malware, viruses and drastically reduce the chance of data loss. Our Anti-Virus solutions can prevent, detect and respond to all threats that might affect your business' assets.

Our Supplier: **Bitdefender,** the global cybersecurity leader protecting systems.

Email Anti-spam
Built for your business.

While many email platforms have software to filter out scam emails, spam and phishing mails can still get through to your inbox.

Advanced anti-spam email security to block phishing, spam, malware, viruses, ransomware, and other email threats. Our advanced, easy to use email security solutions are office 365 compatible.

Our Supplier: **SpamTitan**, business email spam protection.

Microsoft 365 and Teams Backup
Securing your data.

Backup your Microsoft 365 estate including Exchange, Sharepoint and Teams to protect hundreds of Microsoft 365 files and mailboxes.

Protect against data loss when migrating to the cloud.

NPIT will provide you with a complete copy of all your Microsoft 365 data so that you can recover anything on exchange email, OneDrive, SharePoint, or Teams in the event of a problem.

Our Supplier: **Acronis**, backup Software For Home, Business and Resale.

Endpoint Management and Security.
Securely manage iOS, Android, Windows, and Mac OS devices with a single endpoint management solution.

Using a combination of Azure and Intune restrict access to only the apps on the device that your employees need. Build, run and manage applications across multiple clouds, on-premises and remotely.

Our Supplier: **Microsoft Azure and Intune**

Training.

Audits and Compliance Checks.

Ensure all devices are continuously complaint with the UK-wide, government backed Cyber Essentials certification. We audit, create, and manage your cyber security policy to be sure it is aligned with the requirements of the programme then process you certification...

No Problem IT
Safe. Secure. Sorted.

(cont.) Audits &Compliance Checks.	Our initial investigation looks at your devices, hardware, backup solutions, cloud, and security policies. This audit serves to discover weaknesses within your IT infrastructure and ensure effective controls are in place for your devices, compliance and GDPR readiness.

Cyber-Essentials

Achieving Cyber Essentials Plus, an official certification standard, requires an audit by a certified assessor. We achieve this for you using our remote auditing service so that your business can maintain continuity – regardless of whether you are all based in one office.

Cybersmart – compliancy

Ensure all devices are continuously complaint with a UK-wide, government
backed certification. Tis incudes a full audit of your devices, compliance and GDPR readiness.
- o   No disruptive projects
- o   **Seamless delivery**
- o   Ongoing – means third party not getting involved with clients.

Secure Remote Working

This has been a rising trend over the last few years, especially with the increased use of BYOD (Bring Your Own Device). However, employees using their own devices at work and at home can also lead to some serious security concerns.

It is vital to ensure you have the right setup for a complete remote working package, with secure data and zero disruption.

No Problem IT can support your efforts to protect your data and enable a more productive and effective remote team. We will:
- Run a complete health check of your systems and devices; assess their compatibility for remote working and whether the security and software is up-to-date.
- Provide a check list of what you need to do to set up remote working.
- Install the necessary software to enable remote working for you and your colleagues.
- If your systems are out-of-date or not compatible with remote working, NPIT can recommend possible alternatives.

Contact No Problem IT today to discuss your Cybersecurity Solutions and future proof your IT. From maintaining your IT Infrastructure to securing your data, we are experts in IT Support.
