

No Problem IT

Safe. Secure. Sorted.

Growth Through Technology.

No Problem IT Web Services

We have over 15 years of experience building websites and applications for clients. Our team is proficient with a wide variety of web technologies and Content Management Systems. This enables us to bring the majority of our projects in on time and on budget.

- > Ecommerce Websites
- > Custom responsive Web Design
- > API Integrations
- > iOS/Android App Development

Our developers are fluent in:

- > PHP
- > MSSQL
- > .NET
- > C#
- > MySQL

What Makes Us Special

Our Unique LS Framework

- > Turnkey solution offering maximum performance
- > Scalability
- > Speed and security

Full Stack Solutions

- > Custom-made websites
- > Custom-built backend systems
- > CRM

Global Solutions

Providing for local and international clients from large-scale to niche.

Full Hosting

Providing a UK based datacentre to host clients' website and business data.

Tier 1

Fully Responsive E-commerce Websites

Based on WordPress and WooCommerce Themes and Plugins Development.

- > Secure and easy to manage eCommerce websites.
- > Customised templates and styles with no WordPress theme limitations.
- > Fully responsive, customised plugins to extend or add new functionality to your website.

Tier 2

NPIT's Turnkey WordPress Solution

All the benefits of our fully responsive e-commerce websites, with the added benefit of our LS Framework. Provides optimisations to maximise performance, flexibility, scalability and security.

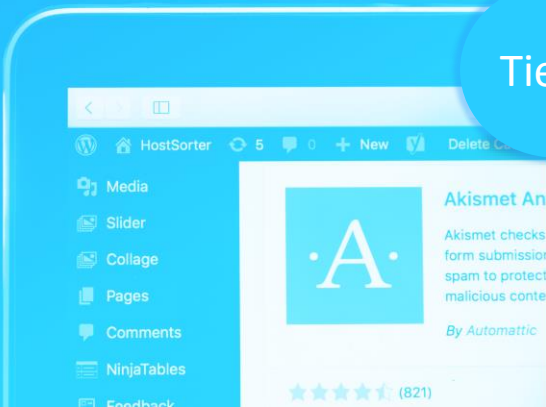

- > Remove the need for WordPress plugins
- > Remove wasted code and anything that is not required
- > Maximise Google Visibility

Tier 3

Bespoke Full Stack Solution

Our Full Stack Offering is Completely Customisable Solution, with Front and Back Ends Developed Specifically To Meet The Needs of The Client.

- > Ideal when an out-of-the-box software is not flexible enough.
- > All the features of a fully responsive e-commerce solution, fully customised.
- > This full stack solution can be built in either PHP and MySQL, or .NET and MSSQL.

The LS Framework builds your website into a structured platform that has been stripped right down and optimised from the ground up. It is more affordable than a Full Stack solution and ideal for those who can't afford a fully built custom package.

This rebuilt WordPress platform provides out-of-the-box features that optimise performance, scalability, speed and security, giving your website the absolute best performance possible anywhere on the web!

The entire code base can be customised so there is no limitation!

Features:

- > Ready-to-use Inform extensions and libraries
- > Basic functionality that allows you to run JavaScript. Code directly – no web developer skills needed
- > WordPress Framework to supercharge your website, maximise Website Speed and SEO
- > Scalability for future requirements

How we optimise:

- > Remove the need for WordPress plugins
- > Remove wasted code and anything that is not required
- > Maximise Google Visibility
- > Incorporate breadcrumbs
- > Review snippets
- > Plus other enhancements

Optimisation for ranking benefits:

- > Inbuilt integration with Google Analytics, Google Tagging, Google shopping for conversion tracking
- > There are no links to Google marketplace or evidence of Google Analytics conversion tagging
- > Google Page Speed
- > Core Web Vitals and Mobile usability
- > Multiple customised API's for payment gateways and logistics providers
- > Site enhancements for Breadcrumbs, Logos, Products, Review snippets and sitelinks search box
- > Google Tag implementation for conversion tracking

Providing solutions and integrations for custom-built API's.

We build custom code to enable API integrations:

- > Empowering client websites to link to systems that don't have native connectivity.
- > Utilising data in a particular way that does not have a pre-existing link solution.

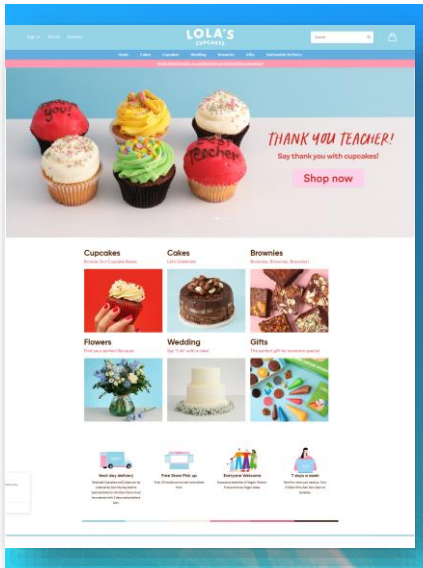

Hosting – NPIT Data Centre

We have invested heavily in our own datacentre providing you with the [accessibility, security and privacy of your business data](#), knowing it is always in safe hands.

Your website, data and contacts are safely stored and backed up at our secure data centre. All incoming emails are routed through [anti-spam and anti-virus filters](#).

- > Compliant with security and Privacy by Design
- > ISO 27001 certified.
- > GDPR compliant.
- > True diverse 2N power feeds, 100% uptime record
- > 24/7 Security, support and technical teams
- > 99.99% Network availability, own dark fibre ring
- > Award winning eco-friendly cooling
- > UK owned and based

Testimonials

“ Their level of understanding of our business requirements is truly outstanding.”

Adam Gay
Director,
DNA Healthcare Ltd

“ As international museum and exhibition design consultants we need to have our communication links working wherever we are in the world... NPIT do an excellent job!”

Jaspar Jacob
Director,
JJA Ltd

“ The site looks great and it's easy to navigate, we've had an increase in orders and the back end is so much easier to manage.”

Yann Vei
Director,
The European Federation of Krav Maga (FEKM)

“ NPIT set up a fully functioning mini Ocado... we were able to handle 4x the number of orders in a matter of days. Without some of the changes achieved (working around the clock) we simply wouldn't have been able to continue to handle the volume.”

Asher Budwig
Managing Director,
Lola's Cupcakes

“ NPIT provided us with their expertise and assistance in a very efficient manner... The team took on board our requirements and provided us with a solution that fits our needs.”

Sarah Mokhtari
Claims Handler,
Pacific Intermediaries & Consultants

“ NPIT were efficient in finding the IT Solution ideal for our business. The support afterwards was the impressive thing – they react very quickly in problem solving, helping us to run our business in the most effective manner.”

Amanda Botterill
Director,
Push Studios Ltd
